### HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

## Determination of Patent Term Adjustment under 35 U.S.C. 154 (b) (application filed on or after May 29, 2000)

The Patent Term Adjustment to date is 823 day(s). If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the Patent Term Adjustment will be 823 day(s).

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) WEB site (<http://pair.uspto.gov>).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. ## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. **Claims 1, 2, 6, 10, 11, 21, 22** are allowed.
2. The following is an examiner's statement of reasons for allowance: The present invention discloses an integrated circuit with a plurality of output signal lines, a plurality data transmitters operable to transmit data communication signals at a signal switching frequency above about 500 megahertz, and a plurality of connection elements each including a fuse for conductively connecting or disconnecting a respective default data transmitter from an output signal line, each connection element also including an anti-fuse for conductively connecting or disconnecting a redundancy data transmitter. The closest prior art, Shioka et al. (US 5,369,642), discloses a system with switchers for redundant signal transmitters that conductively connect and disconnect default and redundancy transmitters using switching units. Another prior art reference, and Farnworth et al. (US 2003/0054592), teaches connecting and disconnecting wafer level components using fuses and anti-fuses. However, Shioka et al. teaches the switches are connected between the connectors (e.g., coaxial connectors) of cable locations between transmitters. Balanced two-core cables and coaxial cables describe in Shioka are not found incorporated within chip, but rather, only in much larger systems such as between boards of a switch system. Like the MOSFET-switching arrangement described in the background section of applicants' Specification, the switching devices in Shioka are poorly suit to switching data communication signals from data transmitters onto output signal lines at signal switching frequencies above about 500 MHz. Farnworth teaches a wafer-level system in which fuses and anti-fuses of a wafer connect or disconnect circuit elements, but makes no reference to using

fuses or antifuses to connect data transmitters to output signal lines for transmitting data communication signals at signal switching frequencies over 500 MHz through such fuses or antifuses.

The combination of Shioka and Farnworth fails to teach an apparatus comprising an integrated circuit or chip in which an individual integrated circuit includes a fuse, an antifuse or both for conductively connecting and disconnecting a default data transmitter on the same chip to an output signal for transmitting a data communication signal above about 500 MHz.

These limitations distinguish the claims over the prior art, rendering them allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
